CAREER OBJECTIVE

Motivated B. Tech Computer Science student specializing in Generative AI and Machine Learning, aspiring to build a successful career as a Software Engineer. Seeking opportunities to apply my programming, problemsolving, and software development skills in real-world projects. Passionate about learning emerging technologies, developing innovative solutions, and continuously improving my technical expertise. Eager to contribute to a dynamic organization while growing as a skilled and responsible technology professional.

EDUCATION:

BTech (CSE – AI & ML), Lendi Institute of engineering and technology, Vizianagaram | **CGPA: 8.5** (2028)
Intermediate, Ravindra Bharathi Junior College, Vishakhapatnam | 61.9% (2024)
10th, Sri Chaitanya high School, Vizianagaram. | 77.5% (2022)

TECHNICAL SKILLS:

Programming Languages: C, Python
Databases: MySQL
Tools & Performs: VS Code
Core Computer Science: DSA, OOPS, DBMS

INTERNSHIPS:

AICTE Virtual Intern — Edu Skills

Generative AI, Deep Learning & Language Models Virtual Internship

- During this internship, I strengthened my understanding of Generative AI, Deep Learning, LLMs, AI concepts and practical applications.

Google AI-ML Virtual Internship

- This internship provided valuable exposure to: AI&ML fundamentals, Data preprocessing and model development. Real-world AI applications.

CERTIFICATIONS:

AI in Action Job Simulation Certification - Forage
Automation Anywhere Certification
Lingua Skills
Introduction to Modern AI – Cisco Networking Academy

PERSONAL TRAITS:

Good communication and teamwork skills

Strong willingness to learn and adapt

Responsible and detail-oriented approach

PROJECTS:

Road Guard AI (Design Thinking Innovation – Academic Project)

- Developed a safety-focused intelligent navigation system that evaluates multiple real-world factors to recommend safer travel routes.
- Designed a route comparison module with visual risk indicators to help users make informed and secure navigation decisions.
- Built the system with a scalable architecture that can be enhanced using real-time traffic data and AI/Machine Learning techniques.
- Implemented the project to promote road safety by prioritizing safer routes over the shortest path, improving the overall user navigation experience.

DECLARATION:

I hereby affirm that the above information in this document is accurate and true to the best of my knowledge.

(Runkana. Venkataramana)
